CS453/553 Scientific Visualization: Term Project

Due December 10, 2020 at 7:59pm

In the term project, you will finalize the work you have proposed in the term project proposal that was agreed by the course instructor. As part of the project, you will perform the following tasks:

Before 7:59pm on December 10, 2020, turn in the final report, source code and anything necessary to compile and run your program and run your data. **If your program does not compile or run, it will be considered as being not functional and graded as such. Late submissions are not accepted for the term project.** The final report should be in the format from the example paper using LaTex: example_paper.zip. Note that writing with LaTex is required.

There should be required sections such as the abstract, introduction, previous work, background, results, evaluation, division of tasks, conclusions, and bibliography. If you are on option 1, you also need to include a section on interpretation of your visualization results.
